PROFESSIONAL SUMMARY

Data Scientist with an MSc in Big Data Analytics specializing in predictive modeling, credit risk analysis, and scorecard development. Experienced in building and validating statistical models using SQL and Python, performing customer segmentation, and analyzing large transactional datasets to support risk-based decision-making. Strong background in model performance measurement, financial variable analysis (FICO, utilization, probability of default), and translating business requirements into statistically sound solutions.

EDUCATION

Masters of Big Data Analytics, Trent University, Canada | 09/2023 – 12/2024

GPA: 90.5

Relevant Coursework: Big Data, Data Mining, Machine Learning, Data Science with Python, Data Visualization, Statistical Modeling, Python, SQL.

TECHNICAL SKILLS

- Programming & Data Tools: SQL (advanced queries, large dataset analysis), Python (Pandas, NumPy), Power BI (DAX), Advanced Excel
- Statistical & Risk Modeling: Logistic regression, scorecard development, probability of default (PD) modeling, customer segmentation, model validation (ROC-AUC), optimization analysis
- Analytics & Business Application: Credit risk analysis, financial variable analysis (FICO, utilization), performance monitoring, KPI reporting, data validation
- Data Management: ETL workflows, data quality controls, structured documentation

EXPERIENCE

Data Analyst Intern - Longworth Dental Clinic, Ontario 09/2024 – 02/2025

- Improved reporting accuracy by **25%**, as measured by reduced reconciliation discrepancies, by collecting, validating, and structuring large operational and customer datasets.
- Enhanced management decision-making visibility, as measured by weekly executive adoption, by preparing recurring performance and financial reports tracking revenue, customer trends, and risk indicators.
- Strengthened customer segmentation insights, as measured by improved service targeting, by developing Power BI dashboards analyzing behavioral patterns and operational KPIs.
- Increased reporting efficiency by **30%**, as measured by turnaround time reduction, by automating SQL- and Python-based data preparation workflows and structured scorecard-style reporting.
- Reduced recurring data errors by **20%**, as measured by internal audits, by performing root cause analysis and implementing validation controls to improve data integrity.
- Contributed to a **58% reduction in negative customer feedback**, as measured by post-implementation surveys, by translating analytical findings into process optimization strategies.
- Improved process consistency and documentation quality, as measured by standardized report usage across teams, by formalizing data definitions, reporting logic, and monitoring procedures.

ACADEMIC PROJECTS

Credit Risk Default Prediction Project (Python, SQL)

- Improved default risk prediction accuracy, as measured by Test ROC-AUC of **0.6684**, by developing a logistic regression-based scorecard model using engineered financial and behavioral variables.
- Enhanced portfolio risk segmentation, as measured by probability-of-default banding and decile analysis, by building SQL-driven customer segmentation frameworks and performing model validation and performance monitoring.

Retail & Customer Insights Dashboard (Power BI, SQL, Excel)

- Increased revenue trend visibility by **20%**, as measured by stakeholder adoption, by analyzing transactional datasets and developing segmentation-based performance dashboards.
- Strengthened performance optimization efforts, as measured by SKU-level variance tracking, by building financial reporting frameworks supporting monitoring and forecasting analysis.

Banking Performance & Customer Insights Dashboard (Power BI, SQL, Excel)

- Improved portfolio monitoring accuracy, as measured by trend variance identification, by aggregating and analyzing large-scale banking transaction datasets.
- Enhanced executive-level financial reporting, as measured by quarterly review utilization, by developing dashboards supporting customer segmentation, performance measurement, and risk indicator tracking.

CERTIFICATIONS & PUBLICATIONS

- Microsoft Certified: Power BI Data Analyst Associate.
- Microsoft Certified: Azure Fundamentals.
- DataCamp Certified: Associate Data Analyst in SQL.
- Publication: Hand Sign Language Detection Using Machine Learning - DOI: 10.48175/IJARSCT-4144
